**eMPF Team Deployment - Batch 1**

**Apply Now**

Company: Frankasia Search Limited

Location: Hong Kong

Category: computer-and-mathematical

We are looking for highly skilled and motivated Data Engineers to work on the largest financial project in Hong Kong. As a Data Engineer, you will play a key role in managing and coordinating activities for the ETL processes to perform data migration. Your primary responsibility will be to ensure the successful migration of structured data within tight project deadlines. Responsibilities: Carry out ETL processes to perform data migration. Perform data quality checking to ensure the accuracy, completeness, and integrity of migrated data. Conduct health checks to identify and resolve and issues or discrepancies in the data migration process. Collaborate with stakeholders to understand data mapping requirements and implement efficient and accurate data transformations. Coordinate the loading of information back to the data warehouse, ensuring it is done correctly and in a timely manner. Monitor and report on the progress of the data migration plan, ensuring data quality standards are met. Develop and implement strategies to optimize data quality and improve the overall efficiency of the data migration process. Requirements Minimum 3 years as a Data Engineer, or related. Fluency in English and Cantonese is a must. Mandarin is an added bonus. Proven experience in managing and coordinating ETL processes for data migration. Strong experience in Oracle, SQL (Oracle SQL, MS SQL, etc.), and Python. Excellent communication skills to effectively collaborate with various stakeholders. Problem-solving mindset and ability to identify and mitigate risks. Strong attention to detail and ability to meet project deadlines. Benefits The opportunity to work on a genuinely large-scale project. The chance to gain deep expertise in the Financial Services and Insurance (FSI) industry. Extremely competitive remuneration and career advancement opportunities. Highly convenient

working location. Working closely alongside the best technical talent in the industry.

3+ years

• Minimum 3 years as a Data Engineer, or related. • Fluency in English and Cantonese is a must. Mandarin would be nice to have. • Proven experience in managing and coordinating ETL processes for data migration. • Strong experience in Oracle, SQL (Oracle SQL, MS SQL, etc). • Excellent communication skills to effectively collaborate with various stakeholders. • Problem-solving mindset and ability to identify and mitigate risks. • Strong attention to detail and ability to meet tight project deadlines.
